**MAGNUM FORGE SELECTED TO LEAD PROJECT TO STAND UP ALL ENTERPRISE SYSTEMS FOR OKLAHOMA CITY-BASED STARTUP**

OKLAHOMA CITY, OK (JAN 15, 2018) – Magnum Forge, an upstream energy IT management consulting firm, has been selected by an Oklahoma City-based exploration and production startup to manage a project for the rapid deployment of IT systems that will be used to run the company. The systems involved cover the full scope of upstream work, from G&G and engineering systems to production volume systems to accounting and land systems. The company recently acquired properties in one of the most viable plays in the country: the prolific Merge/SCOOP/STACK play in central Oklahoma. The project is under tight deadlines to stand up systems as transition service agreements expire.

“Magnum Forge has worked closely for years with many of the principal players in this new entity,” said Russell Corl, Magnum Forge Managing Partner. “We are honored to have been selected to support the new company and I’m confident that our experience with a broad range of systems and upstream business practices will be a significant help to our new client.”
